

Imprimis Pharmaceuticals to Offer Compounded Cyclosporine Alternative to Restasis®

October 19, 2017

SAN DIEGO, Oct. 19, 2017 /PRNewswire/ -- Imprimis Pharmaceuticals, Inc. (NASDAQ: IMMY), an ophthalmology-focused pharmaceutical company, today announced it is making compounded Cyclosporine-based formulations available for physicians to consider prescribing as customizable and potentially lower-cost alternatives to Restasis®. Imprimis' Cyclosporine-based compounded formulations, which will be packaged in a multi-use preservative-free bottle, are patent-pending and include "Klarity Drops™," a patented formulation developed by renowned ophthalmologist Richard L. Lindstrom, MD.

Dry Eye Disease is estimated to affect up to 30 million Americans and is commonly characterized by irritated, gritty, scratchy or burning eyes, blurred vision, and feeling particles in the eye when there are none. Advanced Dry Eye Disease may damage the front surface of the eye and ultimately impair vision. The Imprimis Cyclosporine-based formulations, which are made from FDA-approved drug components and compounded in FDA-inspected facilities, require a patient specific prescription and may be customized according to patients' individual needs.

Mark L. Baum, CEO of Imprimis stated, "We believe Dry Eye Disease patients can benefit from unique customized medications that are not commercially available. While physicians who use compounded Cyclosporine formulations have anecdotally known this for many years, there is now published [data](#) that demonstrates the clinical value of topical Cyclosporine formulations at concentrations greater than those currently available in commercially available medications. We are pleased to be able to offer affordable customized Cyclosporine formulations that are designed for patients' individual needs."

Baum added, "Imprimis has long championed issues of access, affordability and competition. While there are an estimated 30 million Americans suffering from Dry Eye Disease, only a small fraction of these patients receive therapy. Topical Cyclosporine, which is an off-patent and inexpensive drug, can cost more than \$5,000 per year when it is purchased in the commercially available form of Restasis®. We believe that affordability can affect access to needed medications, and it is our hope that our formulations will allow more patients to gain access to a high quality customized Cyclosporine treatment option."

In addition to this announcement, Imprimis will soon make publicly available a presentation on Surface Pharmaceuticals, Inc. Surface is a wholly owned subsidiary of Imprimis that is focused entirely on ocular surface disease, including Dry Eye Disease and Blepharitis. Surface has three core drug formulations based on two issued US patents and three pending patents, and intends to seek FDA-approval through the 505(b)(2) pathway for as many as five ocular surface disease and ophthalmic indications.

ABOUT IMPRIMIS PHARMACEUTICALS

Imprimis Pharmaceuticals, Inc. (NASDAQ: IMMY) is an ophthalmology-focused pharmaceutical company that produces and dispenses high quality innovative medications in all 50 states. Imprimis is dedicated to patient access and affordability to many critical medicines. Headquartered in San Diego, California, Imprimis produces and dispenses from both California and New Jersey. Imprimis is the largest shareholder of Eton Pharmaceuticals, Inc. (www.etonpharma.com), a company it spun out in 2017. Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Any statements in this release that are not historical facts may be considered such "forward looking statements." Forward-

looking statements are based on management's current expectations and are subject to risks and uncertainties which may cause results to differ materially and adversely from the statements contained herein. Some of the potential risks and uncertainties that could cause actual results to differ from those predicted include our ability to make commercially available our compounded formulations and technologies in a timely manner or at all; physician interest in prescribing our formulations; risks related to our compounding pharmacy operations; our ability to enter into other strategic alliances, including arrangements with pharmacies, physicians and healthcare organizations for the development and distribution of our formulations; our ability to obtain intellectual property protection for our assets; our ability to accurately estimate our expenses and cash burn, and raise additional funds when necessary; risks related to research and development activities; the projected size of the potential market for our technologies and formulations; unexpected new data, safety and technical issues; regulatory and market developments impacting compounding pharmacies, outsourcing facilities and the pharmaceutical industry; competition; and market conditions. These and additional risks and uncertainties are more fully described in Imprimis' filings with the Securities and Exchange Commission, including its Annual Report on Form 10-K and its Quarterly Reports on Form 10-Q. Such documents may be read free of charge on the SEC's web site at www.sec.gov. Undue reliance should not be placed on forward looking statements, which speak only as of the date they are made. Except as required by law, Imprimis undertakes no obligation to update any forward-looking statements to reflect new information, events or circumstances after the date they are made, or to reflect the occurrence of unanticipated events.

Other than drugs compounded at a registered outsourcing facility, all Imprimis compounded formulations may only be prescribed pursuant to a physician prescription for an individually identified patient consistent with federal and state laws.
